

Just Be You

I **SEE** you, dear little one
Won't you come out and play out here?
It seems like the sky is falling, the sea is rising
Your world is crashing down
I've been there too.

I **hear** you, dear little one
Won't you let go and cry out here?
You'll feel like weights have fallen, chains are broken
Some words can bring you down
I know that too.

Dear little one, let me hold your hands
When you are ready, take **one step** at a time
Dear little one, I'm right here with you
If you are not ready, take **one breath** at a time
Darkness will come and soon you'll see the **light**
Dear little one, **you're not alone**

Just be you
Just be you

I **love** you, dear little one
Won't you take a chance and go out there?
You know your heart is calling, even when you're doubting
Like a bird it's time to fly
I believe in you

Dear little one, let me hold your hands
When you are ready, take **one step** at a time.
Dear little one, I'm right here with you
If you are not ready, take **one breath** at a time
Darkness will come and soon you'll see the **light**
Dear little one, **you're not alone**.

Just be you.
Just be you
